ELECTRIC GUITAR E.D. Extended Durability: COATED NICKEL PLATED ROUND WOUND - MAGMA's new E.D. "EXTENDED DURABILITY" strings have been designed and manufactured for extended life. The E.D. line is made with a COATED nickel-plated steel wrap that creates a barrier to protect the strings against deterioration associated with normal use, and allows these strings to last 3 to 4 times more than traditional strings.

MAGMA STRINGS

ELECTRIC GUITAR FLAT		MAGMA FLAT Electric Guitar strings are made of stainless steel, round wound and then they are flattened. This process provides higher sustain, volume and brilliance than traditional flat strings and the soft and smooth playing surface eliminates unwanted finger noise and squeaks. And, Magma FLAT strings last longer than traditional strings.

ELECTRIC BASS COATED E.D.		The new MAGMA STRINGS E.D. "EXTENDED DURABILITY" designed for electric bass have been manufactured to extend their durability life. This product line is manufactured with a COATED nickel-plated steel wrap, which creates a barrier to protect the strings against deterioration associated to normal use, and allows these strings to last from 3 to 4 times more than regular strings.

ACOUSTIC GUITAR FLATTENED PHOSPHOR BRONZE ROUND WOUND		FLAT PHOSPHOR BRONZE MAGMA FLAT acoustic guitar strings are phosphor bronze round wound and then they are flattened. This process provides higher volume, brilliance and sustain than traditional flat strings. The soft and smooth surface eliminates finger noise and squeaks, providing a clear and deep sound. These FLAT strings last longer than higher than round wound strings. They are great for live performances and recording.
